ABOUT ME

I am Pol Rius Banús, a passionate Technical Artist with a focus on coding, optimization, and cutting-edge technologies. My goal is to continuously grow and refine my skills in the dynamic field of game development.

EXPERIENCE

- Zitro International (Zitro S.A.R.L), Spain 2025 - 2026
 - Technical liaison for art/dev alignment and game optimization; developed bespoke Godot tools to automate and enhance pipeline efficiency.

EDUCATION

- Degree in Design and Videogame Development, UPC-CITM / 2020 - 2024
- Postgraduate in Technical Artist, UPC-CITM / 2024

PROJECTS

2D Fluid Simulation Tool

- *Created a 2D fluid simulation tool in Unity using compute shaders for real-time fluid dynamics.*
- *Tackled optimization challenges, improving performance.*

Guardians of the Galaxy: The Bet.

- *Contributed to the creation of a collaborative game utilizing a custom-built game engine.*
- *Developed the particle system from scratch, enhancing visual effects.*

PAK-ENGINE

- *Developed a custom video game engine with features such as model/texture import, camera culling, and mouse picking.*
- *Incorporated advanced features, such as particle systems and shaders.*

SKILLS

- **Programming Languages:** C, C++, C#, Flutter, GLSL, Julia, HLSL
- **Tools:** Unity, Unreal Engine, GitHub, OpenGL, Firebase.
- **Languages:**
 - Catalan, Spanish: Native
 - English: B2
